My laptop works with Vista, Outlook 2003 and WMDC
A other computer (X) works with XP an also with outlook 2003
My HTC Touch Diamond is connected by USB cable
Most of my appoument in outlook are made on my laptop
Some of the apointments are made on computer X
Computer X sinc with my laptop via my internal network.
All items are sinc correctly
When I try to sinc my HTC Touch with my laptop only the items made on my
laptop are sinc. Items made on computer X are not sinc.
Thid anywan now abboud this problem?

I found this notice, bud I do not now if this is realy the solution.
I actualy not now how to do this on my device

If you want to sync your
Pocket PC or Smartphone
with 2 PCs with Outlook
and the 2 PCs are both
synchronizing with different
Exchange servers, you need
to use a registry editor on
the mobile device and set
the following key:

```
[HKEY_CURRENT_USER\Software\Microsoft\ActiveSync\EnableNonLocalCrossPollination] = (DWORD)  
1 <<<<<<<<
```
