I think you will find many discussions about this if you search the archives. There is no perfect solution, you'll have to try some of them to get it to work. The two easiest ones are:

1. Remove the device from the cradle and put it in the cradle again to re-sync
2. Restart VS (Yes it does work sometimes)

I have installed SDK correctly, then deploy the program to PPC device again, also is wrong. Detailed message:

```
----- &#24050;&#21551;&#21160;&#37096;&#32626;: &#39033;&#30446;:
SmartDeviceApplication1, &#37197;&#32622;:
Debug Pocket PC -----
&#27491;&#22312;&#37096;&#32626;&#21040; Pocket PC
&#35774;&#22791;&#27491;&#22312;&#20351;&#29992; TCP
&#36830;&#25509;&#20256;&#36755;
&#38169;&#35823;:
&#26080;&#27861;&#24314;&#31435;&#36830;&#25509;&#12290;&#35831;&#30830;&#20
445;&#27492;&#35774;&#22791;&#24050;&#32463;&#19982;&#24320;&#21457;&#35745;
&#31639;&#26426;&#24314;&#31435;&#20102;&#29289;&#29702;&#36830;&#25509;&#12
290;
```

In English, the same meaning is as follows:

```
--Deploymentstared:project:SmartDeviceApplication1,Deploy:
```

```
Debug Pocket PC -----
```

```
Deploying to Pocket PC device, transferring by using TCP
connection
```

```
error: can't establish connection. Please make sure the
physical connection between device and computer has been
established.
```

This problem puzzle me.
Anyone can give some help?

Thanks in advance.
