In this context, "newbie" is actually a useful word. In particular, I suggest using google ([http://groups.google.com/advanced\\_group\\_search](http://groups.google.com/advanced_group_search)) to look up newbie

in this newsgroup. You will see several threads like this from me. But you will also see several discussing possible tools and resources. The amount of info is likely to be overwhelming. So nibble a bit at a time until you have a clearer idea of your needs and possible tools.
