I agree with Arny on the wav files, if I could I would do all my music in wav but for now I'm using 256K bitrate for everything. I'm not only listening to these mp3's on my ipod, but also in my car via my neo-35 car jukebox, and inside the house via my hauppauge mvp's. To me it doesn't matter if I'm in a quiet or noisy area, I want all my mp3's to sound the best that mp3's can, I also use lame via cdex to.
