Well, the bottom line is you can't use the PocketPC Terminal Services Client (TSC) to access your XP Pro Remote Desktop because TSC does not run on your device.

You need to look at VNC. The issue then becomes where to get a VNC client for your 540... I believe the 540 uses the SH3 processor... Here are two clients to choose from...

<http://www.cs.utah.edu/~midgley/wince/vnc.html>

<http://www.conduits.com/ce/apps/vnc.asp>

Get the VNC server software from <http://www.realvnc.com>

Good luck...
