Jakub,

No expansion pack on back, unless it is one held on by Velcro or the like.
But there is certainly NO built-in slot for either a Pcmcia or a CF card.

The larger handheld has a 4in1 slot for SD, mcc-- all cards smaller than the
above cards; but there are 2 USB ports. One is USB2.
Hope this helps.

Say the PDA has only a standard serial port at the bottom.

Thanks,

Joe
