>> *when I select "Stored" then it 'switches automatically' to "All folders", and then I see all my files, with and without memcard icons, all mixed in a mess of files... <<*

verrryyy interesting... but...

You have answered all of the pertinent questions correctly... hmmm

if you have not done it since you have taken all of those steps, remove the card, soft reset the device, after it reboots, reinsert the card and take another look for the "ignore..." file as it get's regenerated in a few seconds if you deleted it on the PPC

If the file is indeed gone, start word and look again.
