BooksCategorys(c) – Published : 07-15-2008 – 05:27:24

This program allows you to build book categorys and a list of book code 'numbers' from the Gutenberg.org website. For each book you have a code. Tap on the book name to view the code and download page for the eBook.

BooksLibrivoxs(c) – Published : 07-15-2008 – 05:27:24

This program is a database of 1,633 eBooks on the Librivox.org website with direct download links. You can search via book name or book author. Tap on the book to view the download area. NOTE: Donate to this site if you use this service.

TextAlphabetical(c) – Published : 07-16-2008 – 05:23:43

This program allows you to select a large text file for sorting. The program then creates a new text file with the lines sorted in alphabetical order.

TextsFormatter(c) – Published : 07-16-2008 – 05:23:43

This program allows you to select a large text file and a width for printing/viewing. Then the program creates a text file with the same name that is 'formatted' to the selected width.

CookingServings(c) – Published : 07-17-2008 – 04:59:11

This program can be used when creating a recipe for a different number of

servings. Select the number of servings on the recipe and the number that you want to make. The program displays the multiplier.

CookingTexts(c) – Published : 07-17-2008 – 04:59:11

This program is database of 84 cooking recipe categories. Start typing the category name to display a list. Tap on the category name to display the online recipes on the <http://mc6help.tripod.com/RecipeLibrary/reecipes.htm> website.

FilesSuffixes(c) – Published : 07-18-2008 – 05:45:33

This program allows you to enter a file ending extension and searches the PocketPC storage RAM and Storage Cards for files that end with the extension. The program then creates a calendar of the files. Tap on the file to start with the associated application.

FileUnfolder(c) – Published : 07-18-2008 – 05:45:33

This program creates a database of all of the files on the PocketPC storage RAM and Storage card. The files are sorted via file name. This way you can find a file without knowing the folder name. Tap on the file to display the profile and start it with the associated application.

KnockerBubbles(c) – Published : 07-19-2008 – 05:31:25

The object of this game is to fly your knocker and use the sides to pop the bubbles before they hit your head. You get 10 points for each one you hit and 100 bonus and next round for all six. Free man every round after five.

KnockerTrees(c) – Published : 07-19-2008 – 05:31:25

The object of this game is to avoid the tree tops and fly your knocker and use the sides to pop the bubbles before they hit your head. You get 10 points for each one you hit and 100 bonus and next round for all six. Free man every round after five.

KnockerKids(c) – Published : 07-20-2008 – 05:54:31

The object of this game is avoid the kids kites and fly your knocker and use the sides to pop the bubbles before they hit your head. You get 10 points for each one you hit and 100 bonus and next round for all six. Free man every round after five.

KnockerKites(c) – Published : 07-20-2008 – 05:54:31

The object of this game is to avoid the kites and fly your knocker and use the sides to pop the bubbles before they hit your head. You get 10 points for each one you hit and 100 bonus and next round for all six. Free man every round after five.

DrinkCategorizer(c) – Published : 07-21-2008 – 05:08:44

This program allows you to build/store databases of your drink mixes. The program allows you to export the database into text or HTML. You can share your recipes via IRDA or Email.

DrinkLimiter(c) – Published : 07-21-2008 – 05:08:44

This program can be used to 'limit' your drinking by dollar value. Enter

the start limit amount for the period. The program allows you enter each time you buy a drink and alerts you of the limit.
