Cory ---

The error means that you have one or more local resources in your project. A local resource is a non-enterprise resource that does not exist in the Enterprise Resource Pool. The solution to this problem is to do the following:

1. Open the project
2. Apply the Resource Sheet view
3. Double-click the first local resource (indicated by the twin heads indicator)
4. Set the Workgroup value to None
5. Click OK
6. Repeat this process for each local resource
7. Save and republish the project

Hope this helps.
