We can help you better if you can be more specific about what you're looking for. The MS site has quite a bit of info on Project's features and some white papers and case studies as well. If that doesn't tell you what you need, ask some specific questions and we'll be more than happy to help.

I was looking for some information (detailed or overview) on its functionality. I had spent a lot of time at the website and really didn't find very much of that type of information.

Thanks for your help,  
Bill

Are you asking what PERT etc means or if Project supports them?

For detailed info on its functionality, check the  
MS Website [www.microsoft.com/project](http://www.microsoft.com/project)

Re: Newbie question

message news:dllvpt\$7uob\$1@xxxxxxxxxxxxxxxxxxxxxxxx

I'm looking at buying some project management software. I'm having trouble finding information about MS Project 2003 that says very much about its functionality: PERT? GANTT? CPM? etc

Any pointers to such information will be greatly appreciated.

Bill
