Hi Jan,

thanks, but sorry I don't get it...I am lost. I clicked menue views--> more views and chose task usage view "Vorgang: Einsatz" as it is called in German. It shows an aggregated view, but it does not show the resources, because as you can see from my example the level two does not have resources explicitly assigned to it. resources are only assigned on level 3. Plus I like to have one line per resource so I know exactly how many work the ressource has been assigned for this specific level 2 task.

Thks.

Jan De Messemaeker schrieb:

HI,

Sie brauchen exact was John anzeigte: der Task Usage View
Ich kann nicht sagen der wievielte View das ist weil die alfabetisch
sortiert sind im View Bar.
Heisst es vielleicht Vorgängengebrauch?
Gruesse

Hi John,

thanks for your reply. I have not quite understood what you mean (could be my english or my project skill etc.; could you maybe specifically tell me the where in the menue i will find it, since i am using a german version). So I am trying to be more specific with an example:

Re: custom report

1. The project plan looks like this

Task Work Resource

Design phase 15
design part a 7
getting information 3 Tom[33%], Anne[33%], James[33%]
consolidating infos 1 Tom[50%], Anne[50%]
working on design 3 James[50%], Anne[50%]
desgin part b 8
getting information 3 Tom[33%], Anne[33%], James[33%]
consolidating infos 2 Tom[50%], Anne[50%]
working on design 3 James[50%], Anne[50%]

now i like to have a table/report like this:

Level 2 Taks Resource Work
(aggregated work of level three tasks)

design part a Tom 4,5
desgin part a Anne 3
desing part a James 2,5
design part b Tom 5
desgin part b Anne 3,5
desing part b James 2,5

thank you.

Hi there,

I am trying to come up with a report like this
(these are the

columns):

Re: custom report

task resource work

Well the clue is that I like to have only tasks on level two and the work per resource should be aggregated from the lower levels.

Could anybody please help me with this.

Thks in advance. I really appreciate any help.

stpauli,

Just looking at your proposed report columns I suggest you take a look at one of the usage views, probably the Task Usage view. Does it have what you need, or at least close enough?

As far as your clue is concerned, I guess I'm just not a good detective because I have no idea what you "like" to have. Sherlock is not one of the MVPs. Please try that one again.
