Great leads! Thanks!

Line from a Leheer song went "Plagerize. Let no one else's work evade your eyes..." Nothing like a little insight from a Harvard prof – or EX-Harvard prof.

Now to assimilate all the information I've received today.

David (and Kat),

When in doubt, plagiarize. Find a web site you like, View the Source code and copy/paste it.

Here are a couple of sites for good references on tags:

http://www.web-source.net/html_codes_chart.htm

<http://www.htmlgoodies.com/>

And here's one (toward the bottom) that lists the web safe colors by RGB ad hex values: http://www.web-source.net/216_color_chart.htm

Even though this site: <http://www.serif.com/forum/default.asp> is about Serif (and about half-way down, WebPlus) there are usually several discussions about coding. You have to register to post (to prevent spammers) but guests can view threads.

Thanks Rob. If you have something a bit more specific...like alternative code...would love to see it. In the meantime at least I know to keep looking.

| You are welcome. You just gave me some extra motivation to work out some

| things that have been on my to do list anyway.

|

| Before I go any further, here is a better code snippet for you:

|

| <font face="Wingdings" color=#a50021

size=3>ñ<font

face="Trebuchet" color=#a50021 size=3>Top

|

| I am almost embarrassed about posting that first snippet. I am so bad at

| coding. Oh well, it worked, even though it had a lot of extra code that

| wasn't needed. I should have waited until I had time to test some more.

This

| one is a bit cleaner...and perhaps not the last ;-) Rob and Mike, if you

are

| reading this, you two have to jump in when I am making a fool of myself

and

| offering such butchered code...yikes.

|

| Here is a different version on linking your thumbnails where he gives a

| different version with an example:

| <http://msmvps.com/blogs/dbartosik/articles/80553.aspx>

|

| And, here is a link to three articles about uploading that might help if

you

| run into a jam:

|

| <http://msmvps.com/blogs/dbartosik/archive/category/1921.aspx>

|

Re: How can I hyperlink to an enlarged picture in Publisher 2003?

| I realize that all of this is a lot to understand, but that's part
of
the

| fun of it all. And you are always learning new and better
ways of doing
| things...look at me for example. Relax... You will be fine.
