That is good news. I was wondering if there was a way to import that into the page. Good job. Until next time...

Dear David,

Finally i have find the solution, i contact the affiliate program – they couldnt find why it dosent work – but they suggest me to try a different code that uses iframe and finally it works...

www.aeroporika.gr

Thanks a lot for the support and your time.

Best regards
Panos

"DavidF" wrote:

Panos,

Good. Now at least I can see what is happening, and can reproduce it on my machine. It is not your machine.

I copied the code you provided at the bottom of the page and inserted it into a Pub 2003 blank web page via a code fragment. It displays correctly in FF3 and pushes off to the right of the screen in IE6, much as it does on your page. Thus far I haven't figured out why it does it, but I did try the

Re: Internet Explorer – Firefox

code in Pub 2000 which uses a different html coding engine, and it works correctly in both IE and FF. So at least I have narrowed it down with how the Pub 2003 coding engine produces the code.

I will keep experimenting, but hopefully someone that understands coding (Rob...you out there ;-), will also play with it and hopefully figure out what needs to be changed.

"Panos" <Panos@xxxxxxxxxxxxxxxxxxxxxxxxxxxx> wrote in message news:823AFD61-91FD-4E54-9F42-D7DEBD5281B2@xxxxxxxxxxxxxxxxxxxx

At the bottom of the page i have also add a text box with the code (i cannot send a link to the source of the code because you need to log in to this affiliate comapny in order to see it)

"Panos" wrote:

David i have try to change the encoding with all the possible options i have in my Pc but nothing.

I have upload a test page here:
<http://www.aeroporika.gr/test/>

I start think if this is a problem only of my PC can anyone here try this page and let me know if you can see the search box displayed correctly or not? (in Internet Explorer)

Thanks a lot
Panos

Panos,

Re: Internet Explorer – Firefox

Sorry, but I still can not get your code to do anything in IE6 or FF3 using Pub 2003 for testing. And yes, I did make sure to put all the code on the 4 lines as you instructed. The web page when previewed with IE6 shows done with an error symbol in the status bar, and nothing in FF. Once again this suggests something wrong with the way the code snippet is written.

I notice that the code snippet specifies charset="ISO-8859-1 . If you go to tools > options > web tab you have the option of changing the encoding. What do you have set? If you aren't using it, you might try Western European (ISO) or other encoding and see if that makes any difference.

If you can do it, create a test folder on your host, and upload the page to that test folder, and give me a link. That way I can see how it actually looks as you are using it, plus study the code. The .jpg

Re: Internet Explorer – Firefox

you posted
was
a
good idea, but it doesn't
show the code...and besides,
for some
reason
I am
unable to get your code
snippet to work in IE or FF.

Alternatively if you could
post a link to the source of
the code ,
perhaps
that would help.

And one other suggestion.
Contact the source of the
code and ask
them
why it
isn't working correctly.

I still tend to think it is a
problem with how the
snippet is
written,
but I
just don't understand coding
well enough to see it. Sorry.

Dear David,

Thanks for
your reply, i
have check
again the
original
code and it
is
as i
posted here.
Also the

Re: Internet Explorer – Firefox

code is
correct
because it
displayed
correctly
in
Firefox, the
problem is
how
publisher
displayed it
in IE. Until
now i
was
used to have
problems
with firefox
compability
but i dont
know how
to
do
with
this..

I have try to
see if the
background
and other
things
maybe
affect
the
code,
so i put it
into a blank
page but i
had the
same
problems.

ignoring
you...just
haven't
had
time
to
work
with
your
code
snippet...but
I
will.
I
imagine
it
is
a
problem
with
how
the
script
is
written,
so
in
the
meantime
I
would
suggest
that
you
go
back
and
study
the
original
script
given
to
you
from
the
source,
and
see
if
you

and
i
see
that
is
not
doing
anything...the
code
is
correct
but
you
need
to
paste
it
in
the
html
code
fragment
in
special
way

Re: Internet Explorer – Firefox

and
not
like
it
appeared
here,
try
to
add
the
code
in

The
code
is
the
correct
but
in
order
to
work
you
must
put
it
in
4
lines,
try
to
add
it
like
that

1st
line:
<script
type="text/javascript">
2nd
line:
var
uri
=
'http://impgb.tradedoubler.com/imp?type(js)g(170832
+
new
String
(Math.random()).substring

Re: Internet Explorer – Firefox

(2,
11);

3rd
line:
document.write('<sc'+'ript
type="text/javascript"
src="'+uri+"'

charset="ISO-8859-1"></sc'+'ript>');

4th
line:
</script>

I
dont
know
why
it
happen
but
when
you
will
do
it
like
that
it
will
appear,
try
it

Re: Internet Explorer – Firefox

it
suppose
to
display
a
search
box
for
flights..i
am
pretty
sure
that
the
code
is
correct
but
the
problem
is
in
publisher.
What
edition
you
used?
i
use
Publisher
2003

IN
this
location
i
have
upload
a
picture
that
you
can
see
how
looks
like
(
<http://www.foofle.gr/edreams.jpg>
)

Hi
Panos,

What
is
the
script
for?
I
inserted
it
into
a
page
and
saw
no
difference
in
the
web
page
preview
in
IE
or
FF.
Perhaps
if
you
explain
what
the
code
is
supposed
to
do,
then
someone
will
be
able
to
suggest

the
issues
with
the
firefox
and
IE
compability,
now
i
am
creating
a
new
website
and
i
have
a
problem
that
i
cannot
find
a
solution..

So
i
need
to
add
the
affiliate
code

```
"  
<script  
type="text/javascript">  
var  
uri  
=  
'http://impgb.tradedoubler.co  
+  
new  
String  
(Math.random()).substring  
(2,  
11);  
document.write('<sc'+ript  
type="text/javascript"
```

```
src="" + uri + ""  
charset="ISO-8859-1"></sc  
</script>  
"
```

When
i
add
it
and
make
preview
webpage
the
whole
page
is
not
displayed
correctly,
the
search
box
of
the
code
is
totally
appeared
somewhere
else
and
the
whole
page
is
spread
(
try
to
add
this
code
in
any
publisher
project
and
you
will
undertand

Re: Internet Explorer – Firefox

what
i
mean
)
From
the
other
hand
with
firefox
everything
work
perfect.

Is
anything
what
i
can
do???
any
suggestion?

Thanks
a
lot
Panos
