Thank you all. I am trying to get quotes from Dell for the charity open license program with Microsoft. I think that is the way they should go. With the amount of money, they could upgrade/replace software on computers and have Office too. There would be no question of legality.

I respect and admire Mr. Bill Gates. He is not a Kennedy but worked hard and made his own money.

>Your new computer will have come with a recovery disk.

Windows will be on that disk.

>If it did not, confront your vendor and insist they give you a recovery disk.
