I have two .PUB files that won't open in Publisher 2000 SP-3 for Windows 2K. Using Notepad, I searched the files' raw coding and found that they were created in "Publisher 3.0". Is that 95 or 97? Anyway, nothing I do can make Publisher 2K open these files. The other threads suggest turning off Norton AntiVirus. My machine has the Symantec corporate version and I don't have Admin rights to turn it off. Any suggestions would be great.
