If you clone this report:

"Computers with specific software registered in Add Remove Programs"

There are two prompts, remove the prompt for Software Title.

revise the SQL

From:

```
Select sys.Netbios_Name0, fcm.SiteCode, sys.User_Domain0, sys.User_Name0,
sys.Operating_System_Name_and0, arp.DisplayName0
FROM v_R_System sys
JOIN v_GS_ADD_REMOVE_PROGRAMS arp ON sys.ResourceID = arp.ResourceID
JOIN v_FullCollectionMembership fcm on sys.ResourceID=fcm.ResourceID
WHERE DisplayName0 = @displayname and fcm.CollectionID=@CollID
```

To:

```
Select sys.Netbios_Name0, fcm.SiteCode, sys.User_Domain0, sys.User_Name0,
sys.Operating_System_Name_and0, arp.DisplayName0
FROM v_R_System sys
JOIN v_GS_ADD_REMOVE_PROGRAMS arp ON sys.ResourceID = arp.ResourceID
JOIN v_FullCollectionMembership fcm on sys.ResourceID=fcm.ResourceID
WHERE fcm.CollectionID=@CollID
```

Hi,

I need to get a report which shows all the software installed on all our servers.

I have tried to clone the "software registered in add remove programs on a specific computer" and change the sql statement so that i can get this information for a collection. When i run the clone report i get a http 500 internal server error yet the generic report on a single computer works

Re: software report showing software in add remove programs on all ser

Re: software report showing software in add remove programs on all ser

fine.

Has someone done this before successfully? The sql statement i am using is below and i was not too sure what i was suppose to do with the sql prompts. i

have configured the prompt as Name CollectionName with Prompt text collection

ID and checked "allow an empty Value" and "provide a SQL statement" Prompt  
SQL statement=select v\_Collection Name  
FROM v\_Collection

SQL Statement:

```
Select Sys.Netbios_Name0, coll.Name, prog.DisplayName0, prog.Publisher0,  
prog.Version0  
From V_R_System Sys  
Join v_FullCollectionMembership ship ON ship.ResourceID=Sys.ResourceID  
Join v_Collection coll on ship.CollectionID=coll.CollectionID  
Join V_GS_ADD_REMOVE_PROGRAMS prog on prog.ResourceID=Sys.ResourceID  
WHERE coll.Name = @CollectionName
```

any help would be appreciated

Regards

Raj
