Hello,

I have a SMS_DEF.MOF to inventory keys in the registry. Everything work fine with XP 32-bit but not with XP 64-bit. I have SMS 2003 with SP1 and with x64 patch (<http://support.microsoft.com/kb/886197/en-us>).

The .MOF file must inventory keys for 32-bit (Hkey_Local_Machine\Software\...) and for 64-bit (Hkey_Local_Machine\Software\Wow6432Node\...). Is it possible?

Thank You.
