We are running SMS 2003 sp1 and having an issue with Reporting. The report summary pages can be viewed but I cannot view the details of a report. whenever I try to drill down to the details page I get the following error message:

An error occurred when the report was run. The details are as follows:  
SELECT permission denied on object 'v\_RA\_System\_SMSInstalledSites', database 'SMS\_BOS', owner 'dbo'.  
Error Number: -2147217911  
Source: Microsoft OLE DB Provider for SQL Server  
Native Error: 229

I am logged on as an SMS Admin; the NT AUTHORITY\SYSTEM account is the account being used to run the report; my account and the NT AUTHORITY\SYSTEM have full control permissions to SMS Reporting and to the SQL database. what am I missing? Any help would be greatly appreciated.

Thanks,  
Karen
