SMS 2003 on server also 2003 server, IIS 6 and Office 2003 web components.

The virtual site name for reporting under IIS is 0

should it be be a another name
I hope the log is help full

ps rsetup.log has this

```
=====
Initialize variables.
IIS is installed.
Start web services.
Configuring Registry.
Executing: ReportingInstall /s
/m=C:\sms2003install\SMS2003EVAL_ENU\SMSSETUP\BIN\I386\rep.val
ReportingInstall.exe returned 0
Finished
```

```
=====
Initialize variables.
IIS is installed.
Start web services.
Configuring Registry.
Executing: ReportingInstall /s
/m=C:\sms2003install\SMS2003EVAL_ENU\SMSSETUP\BIN\I386\rep.val
ReportingInstall.exe returned 19
Logging ReportingSetup.exe Failure.
Virtual Directory already in use by another site.
```

I have checked SMSReportingInstall.log

see below

```
-----
Begin Install CMDLINE=
Value of WWWROOT = c:\inetpub\wwwroot
System tests (IIS, IE, WSH) ok
Checking c:\inetpub\wwwroot\ directory exists
```

Existing directory c:\inetpub\wwwroot\ found
Checking if c:\inetpub\wwwroot\global.asa exists
Directory c:\inetpub\wwwroot\c:\inetpub\wwwroot\ already exists but doesnt
have a global.asa file! – fail.

Begin Install CMDLINE=/s
/m=C:\sms2003install\SMS2003EVAL_ENU\SMSSETUP\BIN\I386\rep.val
Value of WWWROOT = c:\inetpub\wwwroot
System tests (IIS, IE, WSH) ok
Checking c:\inetpub\wwwroot\0 directory exists
Initialize installation log at c:\inetpub\wwwroot\0
Check disk space.
Reset apptitle and enable uninstall.
Register the shared dlls.
Checking if SMSRPHost.exe is installed yet.
SMSRPHost not yet installed, installing.
Starting SMSRPH.exe as a service.
Shared components not installed, installing.
Increasing Rev Count to 1 for 0
Installing main Reporting Point files.
Checking if US English specific files are needed.
Installing ENGLISH specific files
Checking if GERMAN specific files are needed.
Checking if JAPANESE specific files are needed.
Checking if FRENCH specific files are needed.
Installing the image (.gif) files
Editing global.asa for this specific Reporting Point
setting strSiteCode = 0 in global.asa
setting Session("SQLMachine") = 0 in global.asa
setting Session("SQLDatabase") = 0 in global.asa
Creating virtual directory using command line: Cscript.exe
"c:\inetpub\wwwroot\0\Admin\CVDIR.VBS" "0", "c:\inetpub\wwwroot\0"
Detected Windows version 5.2 or above so attempting to enable ASP
Executing command line : CScript.exe
"c:\inetpub\wwwroot\0\Admin\ENBLEASP.VBS"
Start process to restore backed-up Supplemental Reports (if applicable)
Did not detect previous backup of Supplemental Reports
Executing: Cscript.exe c:\inetpub\wwwroot\0\Admin\sizeSuppRpt.VBS
Could not retrieve size of backup Supplemental Reports directory
Secure with NTFS permissions.
Installation of Reporting Point Complete.

Begin Install CMDLINE=/s
/m=C:\sms2003install\SMS2003EVAL_ENU\SMSSETUP\BIN\I386\rep.val
Value of WWWROOT = c:\inetpub\wwwroot
System tests (IIS, IE, WSH) ok
Checking c:\inetpub\wwwroot\0 directory exists
Existing directory c:\inetpub\wwwroot\0 found
Checking if c:\inetpub\wwwroot\0\global.asa exists

Site for directory is not our site(0) – fail.

Begin Install CMDLINE=
Value of WWWROOT = c:\inetpub\wwwroot
