Have you defined an advanced client network access account?

Site settings, component configuraion, software distribution.  
Adam wrote:

Kim,

I also have 2 forests with a 2 way transitive trust between the domains, sms is running in advanced security mode. Wins is configured with the site information, and I have setup the security on the smsclient share as well as the ntfs permissions. When I try to deploy the Advanced Client to workstations in the other domain that the sms server is not located in, I get the following error.

Failed to find accessible soure. Waiting for retry. and  
\\servername\smsclient\i386 is inaccessible.

Thanks

Adam

You'll have to either create an entry in wins so clients can find the mp from there, or manually specify it in your client push installation tab using

smsmp=Yourmp.foresta.domain

Kim,

status in ccmsetup.log in Forest B client & is copying the client installation file in the remote clients machine but clients

Re: sms 2003 advance clients in different AD forest ?

unable to find my  
sms Primary server in Forest A.

and Error is <![LOG[Source  
\\ITSMSME003\SMSCClient\I386 is inaccessible (53)]LOG]!

```
<time="18:57:29.531+000"  
date="05-12-2007" component="ccmsetup"  
context=""
```

```
type="2" thread="1556" file="ccmsetup.cpp:2848">  
<![LOG[Failed to find accessible source. Waiting for  
retry.]LOG]!><time="18:  
57:29.531+000" date="05-12-2007"  
component="ccmsetup" context="" type="2"  
thread="1556" file="ccmsetup.cpp:2877">  
<![LOG[Next retry in 10  
minute(s)...]LOG]!><time="18:57:29.531+000" date="05-  
12-2007" component="ccmsetup" context="" type="0"  
thread="1556"  
file="ccmsetup.cpp:3888">
```

and they unable to find the MP that is Forest A sms Primary  
Site Server.  
Not reporting Site code in Primary Site of SMS in Forest A.

Please Guide

First i would like to thanks Kim,

i will configure the accounts defined by you.  
and let you know the status.

Kim one more query.

we are going to have one more domain that  
will be child domain of ForestB and  
will be in remote location over vpn on  
different subnet.

for this Child domain of Forest B clients.  
what i have to do in sms whether i  
have to deploy any sms server in that  
domain if so the what role i have to  
give to that sms server.

Please help me out & steps for doing that  
will be thankful.

Thanks

Re: sms 2003 advance clients in different AD forest ?

M.Osman

You'll need to define an  
advanced client network  
access account that is a  
member of forest A.
