Hi,

This error is usually related to firewall restrictions. Since the Sync package operates in the context of the Local System, the computer account of the Sync Host probably does not have access to go through the firewall.

You could try the following,

add the IP address of the machine attempting to execute the package to the group of permitted users on the firewall. Worst case, you can manually

download the mssecure.xml by going to

<http://go.microsoft.com/fwlink/?LinkId=23190>. Save the MSSECURE.XML file in the source directory and schedule an update of the DPs following that.

Best regards,

Mark

| Hi,
| I have noticed that no new updates are showing on my SMS machine which i
am
| also using as the sync host. it is configured to sync in unattended mode
and
| I have a looked in the Security SyncXML file and i can see error code
12007
| there.
| Here is what I get:
|
| Specified folder is local, changing it to: C:\PROGRAM
| FILES\SECURITYPATCH\PKGSOURCE
| Download failed - <http://go.microsoft.com/fwlink/?LinkId=23190>
| Sync tool failed to download
| "<http://go.microsoft.com/fwlink/?LinkId=23190>".
| Error code: 12007
| Loaded "E:\SMS_CCM\smsstat.dll"; the module handle is 0x18760000.
