Unfortunately, I don't know what the licensing restrictions are for SBS. You might try posting at [microsoft.public.windows.server.sbs](http://microsoft.public.windows.server.sbs) or checking <http://www.microsoft.com/windowsserver2003/sbs/howtobuy/pricing.msp>. Reading through the material on those pages would lead me to believe that could use the Sql Server in SBS with SQL CE, and that each device would count as 1CAL (assuming you're using device and not user CALs).
