What username and password I need to provide if

1. I use windows authentication

—It will use the device credentials passed in by the RDA or Repl InternetPassword and InternetLogin properties. This should be a valid domain user or a valid local user on the IIS Server.

2. anonymous

—The virtual directory will use the anonymous login account to connect to the SQL Server.

Check out the following document.

[http://msdn.microsoft.com/library/default.asp?url=/library/en-us/dnsqfce/html/sqlce\\_secmodelsцен20.asp](http://msdn.microsoft.com/library/default.asp?url=/library/en-us/dnsqfce/html/sqlce_secmodelsцен20.asp)

| When I run the program, it display Error Message as Follow:

microsoft.public.sqlserver.ce: RE: RDA Problems

Error Code: 80072EFD

Message: A Request to send data to the running IIS has failed. For More information, see HRESULT [,,,,,]

Minor Err : 28037

Source : Microsoft SQL Server 2000 Windows CE edition

The I try to type "<http://William/SOLCE/ssecsa20.dll> in Emulator IE, It prompt me to enter the network username and password ?? Then it Display :

HTTP 401.1 – Unauthorized: Logon Fail Internet Information Services

What username and password I need to provide if

1. I use windows authentication, how about
2. anonymous

Thanksssss
