no, this will not be supported. the code to exchange data between CSV and SQL Mobile/Everywhere is trivial however.

On the desktop – collaboration with ISAM drivers will be supported.?

For example in JET OLEDB 4.0 you can use this query:

```
SELECT * INTO [Excel 8.0;Database=c:\Test.xls].[Sheet1] FROM [Table1]
```

or You can work with dBase, Paradox, Html and other types of data.

Support of Excel data will be surely grateful.

tu.
