I am having a problem installing the SSCE31VSTools-ENU.exe package for Visual Studio 2005 Standard with SP1. Here's what I have:

- * Smart Device Programmability option installed for VS 2005 Std.
- * Downloaded and installed VS SP1 (from Microsoft's website dated 12/14/2006.)
- * SQLServerCE31-EN.msi package has been downloaded and installed (from MS website dated 1/11/2007.)

The error I am getting is: "The upgrade patch cannot be installed by the Windows Installer service because the program to be upgraded may be missing,"

Is this package supported for Visual Studio 2005 Standard with SP1? Or am I missing something?

Thanks for any help.
