Ginny,

Really not meaning to be a Pita here, but my Microsoft SQL Server Compact Edition directory only has a v.3.1 directory and then Docs and SDK subdirectories under that.

I had followed this proc to install mobile (3.0)

1. Run Sqlce30setupen.msi from the <drive>:\Program Files\Microsoft SQL Server\90\Tools\Binn\VSShell\Common7\IDE folder
2. Run ConnWiz30.exe from the Microsoft SQL Server 2005 Mobile Edition\Server folder.

Course the ConnWiz30.exe was located in the Microsoft SQL Server 2005 Mobile Edition\Server folder and SSCE3.1 doesn't have a sever or sync folder.

Do I not have this installed correctly??

Harry
