No. There is a SqlCE OLE DB provider. Currently, there is no ODBC provider.

Are you refering to Kagera?
<http://msdn2.microsoft.com/en-us/library/ms712975.aspx>

That's an OLE DB wrapper around any ODBC driver; I need a wrapper to go
the
other way – an ODBC wrapper around the CE OLE DB driver.

From other replies it seems like there is no ODBC driver
which is a
pity
since I have an Access App which has linked tables to a SQL
server back
end
and I would like to be able link those tables to a SQL CE
database as
well
but with the apparent lack of an ODBC driver this is not
possible
– Does anyone know any different?

I want to connect to SQL CE database
(Server Mobile) using Visual
FoxPro.
Is
there any driver or something else? Please
help me, I am becoming
desperate
