Thanks for the reply,

I have created an msdtc resource in the cluster group.

The sql service, cluster service and the account used to run setup are all domain admins with local admin rights.

I have logged on to the cluster using the accounts.

All devices are accessible.

Terminal services isn't installed

The sqlstp.log file ends with:

```
15:37:11 Setup is performing required operations on
cluster nodes. This may take a few minutes...
15:37:11 C:\WINDOWS\TEMP\SqlSetup\Bin\remsetup.exe
C:\WINDOWS\remsetup.ini
16:06:46 Process Exit Code: (1460) This operation
returned because the timeout period expired.
16:06:46 Begin Action : GetRemsetupRetCode
16:06:46 Installation return status on D-CL04B : -1
16:06:46 End Action : GetRemsetupRetCode
##### SQL Server Remote Setup - Start Time 06/23/04
15:37:11 #####
CThreadPool::RunUntilCompleteHlpr create thread, index=0
CThread::Run thread [0x30] created for execution.
CThread::Process [0x30]
CThreadPool::RunUntilCompleteHlpr start thread
[0x30],index=0
Running "\\D-CL04B\D$\SQLENT\x86\setup\setupsql.exe k=Nb
k=Rm k=C1 -SMS -s -f "\\D-CL04B\D$\SQLENT\x86
\setup\setup.ins" -f1 \\D-CL04B\admin$\D-
CL04B_MSSQLSERVER.iss -f2 "\\D-CL04B\admin$\setup.log" -
e "stpsilnt._ex" -b -x "C:\WINDOWS\TEMP\" (D-CL04B) ...
CThreadPool::RunUntilCompleteHlpr WaitForMultipleObjects
```

```
returned: 0
CThreadPool::RunUntilCompleteHlpr the operation timed out.
CThreadPool::RunUntilComplete returned 1460
CThreadPool::RunUntilComplete execution level=1, need
execution: 0
One or more errors occurred while running the
remote/unattended setups.
Disconnecting from remote machine (D-CL04B)...
Service removed successfully.
Remote files could not be removed.
##### SQL Server Remote Setup – Stop Time 06/23/04
16:06:46 #####
```

The last line of the sqlstp.log file is:

```
15:37:30 "D:\SQLENT\x86
\FullText\MSSearch\Search\SearchStp.exe" /s /a:SQLServer
```

```
16:06:46 End Action : Run setup on cluster nodes
16:06:46 One or more errors occurred while running remote
setup on the clustered machines.
