Geoff...

Installed MSSearch manually on both nodes successfully.

Re-registered gathercl.dll on both nodes successfully.

Re-ran the installation as normal, new errors during the "Setup is creating Virtual Server resources on the Cluster" process:

- An Error Occurred while creating virtual server resources for clustering. Cluster specific registry entries couldn't be written <<OK>>
- Setup is performing cleanup operations on cluster nodes and will exit once the cleanup is complete.

Finally seeing MSSQLSERVER events in Application log of FCIADB1

Per MSKB 872931, added LOCAL SERVICE to the READ permissions on HKLM\SYSTEM\CurrentControlSet\Control\SecurePipeServers\Winreg key

Deleted the existing but offline/unstartable SQL resources from the Cluster

Add MSDTC Resource to the Cluster Group (MSKB 301600 - step 7 on)

Enable DTC Access in Windows 2003 (Add/Remove Programs > Application Server > Enable DTC Access) on both nodes (MSKB 817064)

Add LOCAL SERVICE with Read Permissions to HKLM\SYSTEM\CurrentControlSet\Control\SecurePipeServers\Winreg key on both nodes (MSKB 872931)

Confirm that Remote Registry was started on both nodes

Login to each node as domain account used for install and log off

Installation Successful.

Re: Setup Failed to Perform Req'd operations on CLuster Nodes

Only problem is, that now I cannot apply SP3a.

downloaded & expanded SQLSP3a to c:\sqlsp3a on local node.

SETUP FAILED TO PERFORM OPERATIONS ON CLUSTER THE NODES

log follows:
