This is usually a problem with Kerberos and authentication. You can look at this article for help:

[http://support.microsoft.com/default.aspx?scid=kb;\[LN\];811889](http://support.microsoft.com/default.aspx?scid=kb;[LN];811889)

The error you are getting is different but they are usually caused by the same thing or similar things.

The article mentions a setspn utility. You can download it from here:

<http://www.microsoft.com/windows2000/techinfo/reskit/tools/existing/setspn-o.asp>
