I just opened a crit sit with MS with regards to this issue. Here is how to fix it with Windows 2003, SQL 2000, and Oracle 9i:

This is discussed in Q193893 and according to this the registry key "[HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\MSDTC\MTxOCI]" should have following entries.

"OracleXaLib"="oraclient9.dll"

"OracleSqlLib"="orasql9.dll"

"OracleOciLib"="oci.dll"

I hope this helps.

Carrie
