Every time I start up Enterprise Manager which has several SQL 2k registrations, I get a series of entries like this in my Event | Security log:

Any ideas?

Event Type: Failure Audit

Event Source: Security

Event Category: Detailed Tracking

Event ID: 599

Date: 2/3/2005

Time: 9:22:43 AM

User: domain\user

Computer: myMachine

Description:

Unprotection of auditable protected data.

Data Description: SQL Server Registration

Key Identifier: bff73d00-da7d-407c-ad8f-5a837f4764e6

Protected Data Flags: 0x0

Protection Algorithms: 3DES-168 , SHA1-160

Failure Reason: 0x8009000B
