Sir,

In my project, i have use MS-Remote Connection string. Here i enclosed my connection string.

Connetion string

"Provider=MS Remote;Remote Server=server_address_or_ip_address,default port no;Remote Provider=SQLOLEDB;Data Source=sql_server_name;Initial Catalog=database_name;User ID=xxxxx;Password=xxxxxxx"

but i am getting the following errors.

Error:

Microsoft ADO/RDS error '800a1003'
Cannot connect to server.

Can anyone know about the reason ASAP.
