To determine wich account was used by SQL Agent :
– On Entreprise Manager, Management, Deploy SQL Agent node
– Right Click on SQL Agent and choose properties

You can change the account SQL Agent will be used

SP4 fixes a bug on scheduled job (<http://support.microsoft.com/kb/825042/>)
Now, a non-admin user could run schedule DTS

So it's resolved your issue

Philip

| How do I determine which account was used to start SQL Agent?

|

| My userid is a local administrator.

| I have:

| Stopped & restarted the SQL Service Manager

| Rebooted the SQL Server 2000

| Upgraded to SP4.

|

| The problem remains.

|

| Thanks for your help.
