Hi

Production machine. Had been test machine. Used sql2005 in evaluation mode. Upgraded to purchased copy of SQL 2005. Have applied SP1. Have applied recent hotfixes. Everything looked fine.

Now (two months after installing purchased version of sql2005), getting error message when debugging ssis package: "Warning: 0x80000036 at Package: There are 10 days left in the evaluation. When it expires, packages will not be able to be executed."

This isn't good.

Suggestions?

Thanks,

Rob
