i want to run an asp script to run DTS packedge.  
i have created the packedge in the sql server. only include a connection to access database and a only a sql task (select \* from acctbl).  
i can run the dts successfully in the sql server.  
but i can't run it in the Asp script.  
when i change the connection to a sql database. it is successfully.  
why it faild?  
the asp script is right i think.

```
dim objDTSPackage
dim objDTSSStep
dim strResult
dim blnSucceeded
```

```
const DTSSQLStgFlag_Default = 0
const DTSSStepExecResult_Failure = 1
```

```
set objDTSPackage = Server.CreateObject("DTS.Package")
blnSucceeded = true
```

```
objDTSPackage.LoadFromSQLServer servername, username, pwd,
DTSSQLStgFlag_Default2, "", "",
```

```
"", dtsname
objDTSPackage.Execute
```

```
for each objDTSSStep in objDTSPackage.Steps
if objDTSSStep.ExecutionResult = DTSSStepExecResult_Failure then
strResult = strResult & "Package " & objDTSSStep.Name & " failed.<br>"
blnSucceeded = false
else
strResult = strResult & "Package " & objDTSSStep.Name & "
succeeded.<br>"
end if
next
```

why my asp script failes to process DTS with access database connection?

```
if blnSucceeded then  
Response.Write "<h1>Package Succeeded</h1>"  
else  
Response.Write "<h1>Package Failed</h1>"  
end if
```

```
Response.Write strResult  
end if
```

can anyone help?  
thanks!

.
