Hello

I've defined a full text catalog that indexes several columns from two tables. Now I want to erase it and it simply don't let me... using the console it reports that my catalog has been lost and to use sp_fulltext_catalog to repopulate or rebuild it... I tryied so and the error was the same...

i need to erase that useless catalog because it don't work anymore and i need to do another one with the same name... how can i get it done?!?!

best regards

Jorge Ribeiro
