The installation of MSDE 2000 stops responding when launching sqlredis.exe. It seems that sqlredis.exe launches setupre.exe and hangs there. We don't have f... idea of what's going on. i've seen a lot of people with similar problems on the web but no solutions. Some help would be appreciated.

the OS is windows 200 server but we got the same behavior in other machine.

Thanks to everybody

Inigo
