I am having trouble logging in to MSDE with the Web data Administrator application. When I click on the login page at, nothing seems to happen. I am trying to login using the Windows integration method. I seem to remember this being a common problem as I remember many posts on this forum. But this was about two years ago no, when I first installed MSDE on another machine.

Any help that anyone can provide will be gratefully received.

Thanks.

BadHead :)

OS: Windows XP Professional SP2 (32-bit)
Office Suite: Microsoft Office 2003 Professional SP2

Motherboard: Abit AN8 Fatal1ty
