Hi All,

Could someone please tell me how to fix the following error? This error is appearing on several tables for 2 weeks now. I already ran a complete hardware diagnostics on the server and it is cleaned. Please help, I am getting desperate.

Server: Msg 2535, Level 16, State 1, Line 0  
Table Corrupt: Page (1:566656) is allocated to object ID 1189579276, index ID 255, not to object ID 798625888, index ID 5 found in page header.

Thanks,

Mary
