Hi,

What is the version/edition of SQL Server you are using. Did you patched the SQL server with latest service pack?

Did you tried the below steps:-

1. Perform a complete backup of the database and kleep it in safe place
2. Set the database to single user mode (Alter database <dbname> Single_user with rollback immediate)
- 3 Ensure that TEMPDB have enough space, because DBCC CHECKDB uses tempdb
4. Execute DBCC CHECKDB with REPAIR_REBUILD option

Note:

If the abobe steps fail then you need to restore from good backup or contact Microsoft Support.

Look into the below article for the cause of this error:-

<http://support.microsoft.com/default.aspx?scid=kb;en-us;276992>

Thanks

Hari
