There is a well-known issue when combining a string with NULL in iif(), which you may be encountering. Using a second measure to "hide" the text may work, like:

```
[Measures].[Text1] :
>>
Right([Measures].[Codigo Data Venc Titulo],2) + "/" +
Mid([Measures].[Codigo Data Venc Titulo], 5, 2) + "/" +
Left([Measures].[Codigo Data Venc Titulo],4)
>>
```

```
[Measures].[Text2] :
>>
iif(IsEmpty([Measures].[Codigo Data Venc Titulo]),
NULL, [Measures].[Text1])
>>
```
