Thx, Charles. I will try upgrading to SP2. Regards.

Hi, Mark,  
Thanks for your response.

I am sorry that I did not notice that the "Report" has been moved from the Summary pane of SQL Server 2005 (SP1) to the property menu of the server instance of SQL Server 2005 SP2. Anyway, it is true that your AS Server instance is Enterprise 64 bit edition.

From the error message, I performed further research and found that this issue was confirmed to be a product issue and it might be caused by the following reason:

=====  
It appears that a user can add/delete a perspective only when it s a member of AS2005 server role.

Otherwise, even if the user is granted Full Control of the database permission, it still cannot administrate perspectives. The error message when saving the new perspectives under this user is:

"Perspective is not allowed in Standard server edition. "

=====  
Accroding to the internal logs, to fix this issue, you may need to contact CSS to publish a quick fix for you.

Since the logs were recorded before SQL Server 2005 SP2 released, I recommend that you install SQL Server 2005 SP2 first to see if this issue persists.

Microsoft SQL Server 2005 Service Pack 2

<http://www.microsoft.com/downloads/details.aspx?FamilyID=d07219b2-1e23-49c8-8f0c-63fa18f26d3a&DisplayLang=en>

If SQL 2005 SP2 cannot fix this issue, please contact CSS via telephone for the best support.

To obtain the phone numbers for specific technology request please take a look at the web site listed below.

Get notification to my posts through email? Please refer to:  
<http://msdn.microsoft.com/subscriptions/managednewsgroups/default.aspx#notifications>

If you are using Outlook Express, please make sure you clear the check box "Tools/Options/Read: Get 300 headers at a time" to see your reply promptly.

Note: The MSDN Managed Newsgroup support offering is for non-urgent issues where an initial response from the community or a Microsoft Support Engineer within 1 business day is acceptable. Please note that each follow up response may take approximately 2 business days as the support professional working with you may need further investigation to reach the most efficient resolution. The offering is not appropriate for situations that require urgent, real-time or phone-based interactions or complex project analysis and dump analysis issues. Issues of this nature are best handled working with a dedicated Microsoft Support Engineer by contacting Microsoft Customer Support Services (CSS) at <http://msdn.microsoft.com/subscriptions/support/default.aspx>.
