Hi Rob,

i think you did not understand my problem. Therefore I will post an example:

myTable

id | value

1 | 23

2 | 21

4 | 15

7 | 44

wishedResult

a.id | a.value | b.value (value of the record before)

1 | 23 | NULL

2 | 21 | 23

4 | 15 | 21

7 | 44 | 15
