I ve got an Oracle 9. server running on AIX.

and One SQL Server 2000 Sp 3on w2k
and SQL server 7 on Winnt 4.0

i did link this Oracle server on both SQL serevr. When run an simple SQL query i got different results.

Num of rows are always different In SQL server 7.0 i got 49430 rows(when i check in oracle its correct)

In SQL SErver 2000 i got
49336 rows.

Any idea ?
