Suresh

There are some examples

```
create table ABCD
```

```
(
```

```
  [id]smallint not null,  
  description varchar(20) null
```

```
)
```

```
insert into ABCD([id],description)values (1,'DFh2AcZ')
```

```
insert into ABCD([id],description)values (2,'dHZ3')
```

```
)
```

```
SELECT description FROM ABCD where charindex(cast('H' as  
varbinary(20)),cast(description as varbinary(20)))> 0
```

```
SELECT description
```

```
FROM ABCD
```

```
WHERE description = 'dHZ3'COLLATE Latin1_General_BIN
```

```
SELECT description
```

```
FROM ABCD
```

```
WHERE charindex('h',description COLLATE Latin1_General_BIN)>0
```
