Hi

Just wanted to add that login with such names (INFORMATION\_SCHEMA ) are highly not recommended as it reserved by MS

More over , try going back to rename the owner (to dbo) and you will fail

Eric

Do you have a login INFORMATION\_SCHEMA granted access to the master database? And it is not a member of sysadmin server role db\_owner database role, right?

"Eric" <[ericbragas@xxxxxxxxxx](mailto:ericbragas@xxxxxxxxxx)> wrote in message

I created the procedure master.dbo.Table\_Estimated\_Rows, but am now trying to change ownership from "dbo" to "INFORMATION\_SCHEMA".

When

trying to execute the following statement, I get the following error.

I'm following advice from a SQL Server Central article (<http://preview.tinyurl.com/mmhcm2>) on creating utility procedures, but it doesn't tell how to resolve this error.

What do I need to do in order for the statement to execute successfully?

```
EXEC sp_ChangeObjectOwner 'TABLE_ESTIMATED_ROWS',  
'INFORMATION_SCHEMA'
```

Re: You are not the owner specified for the object 'INFORMATION\_SCHEMA'...

Re: You are not the owner specified for the object 'INFORMATION\_SCHEMA'...

gets the following error:

Msg 2710, Level 16, State 1, Line 1

You are not the owner specified for the object 'INFORMATION\_SCHEMA'  
in  
this statement (CREATE, ALTER, TRUNCATE, UPDATE STATISTICS or  
BULK  
INSERT).
