Anthony,

there's loads on the web about log-shipping eg

http://www.sql-server-performance.com/sql_server_log_shipping.asp

<http://support.microsoft.com/default.aspx?scid=kb:en-us:323135&sd=tech>

The monitoring server is a third server or the standby, simply because if it was the primary server and that went down, there would be no more monitoring :)

Cheers,

Paul Ibison SQL Server MVP, www.replicationanswers.com
