Are you using immediate updating subscribers? If so MSDTC has to be running.

"Fernando Ipiál M." <FernandoIpiálM@xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx> wrote in message news:B465BA73-B663-421F-AD08-F73CA8B201EF@xxxxxxxxxxxxxxxxxxxxxxxx

I am implementing replication in 3 computers: publisher, distributor, subscriber. But in moment the suscription i have this message: the operation could not be performed because OLE DB provider 'SQLNCLI' for linked server 'I16E' was unable to begin a distributed transaction. Changed database context to 'ejercicio'. OLE DB provider 'SQLNCLI' for linked server 'I16E' returnde message No transaction is active. Microsoft SQL Server, Error 7391.

I read this article: <http://support.microsoft.com/kb/839279/en-us>

Thank you
