Hi,

I have several DTS packages I'd like to archive somehow. How can I do so?

Take the backup of MSDB database. or have a look into the below link

http://nicksumner.com/software/SOL_Xf1/SOL_Xf1.htm

<http://www.databasejournal.com/features/mssql/article.php/1462601>

How do I transfer DTS packages from one server to another?

<http://www.sqldts.com/default.aspx?204>

And, how do I transfer database diagrams from one server to another, or save database diagrams (for archiving purposes, for example?)

<http://www.mssqlcity.com/FAQ/TranMove/MoveDiag.htm>

Thanks

Hari
